EDUCATION	<b>Postdoctoral Research Fellow</b> 2019–current <i>The University of Texas at Austin</i> , USA Advisor: Dr. Ufuk Topcu Research focus: Data driven constrained autonomy with safety guarantees <b>Doctoral student in Electrical Engineering</b> 2014 – 2018 <i>The University of New Mexico</i> (UNM), USA <b>GPA: 4.26/4.0</b> Advisor: Dr. Meeko M. K. Oishi PhD Thesis: Scalable Stochastic Reachability: Theory, Computation, & Control Research areas: Optimization (convex, discrete, and stochastic), control theory <b>Bachelor &amp; Master of Technology</b> 2009 – 2014 <i>Indian Institute of Technology Madras</i> (IITM), India <b>GPA: 8.59/10</b> Major: Electrical Engineering      Minor: Biomedical Engineering Master Thesis: Deterministic Attitude Estimation
PROGRAMMING LANGUAGES	Proficient — Python, MATLAB Familiar — C, C++, HTML, CSS, Javascript
TOOLS	Git, Vim, Gurobi, Raspberry Pi, Resin, PhoneGap, Amazon Web Services
RESEARCH PROJECTS	<b>Control of constrained stochastic systems</b> ... April 2016 – December, 2018 ◦ Proposed optimization-based (convex and stochastic) for probabilistic safety guarantees in systems controlled by a human and/or autonomous agents ◦ Developed SReachTools, a repeatability-evaluated, unit-tested, open-source MATLAB toolbox (8,940 lines of code with 8,240 lines of comments) ◦ Useful in safe autonomy applications: obstacle avoidance, autonomous surveillance, spacecraft rendezvous, and automated anesthesia delivery system <b>Validation of cognitive models</b> ..... January 2015 – March 2016 ◦ Analyzed a cognitive model for the actions of an average human participant <b>Deterministic attitude estimation for robotics</b> .... May 2013 – June 2014 ◦ Designed an algorithm for orientation estimation (hardware validation)
INTERNSHIPS	<b>Student Intern — R&amp;D (Connected cars)</b> ..... Summer 2017 <i>Nissan Research Center — Silicon Valley</i> , Sunnyvale, California, US ◦ Developed location estimation techniques using CAN and GPS data for cars ◦ Created a Python-based workflow for secure over-the-air updates <b>Interim Engineering Intern</b> ..... Summer 2012 <i>Qualcomm Incorporated</i> , Hyderabad, India ◦ Analyzed performance of the DRAM with the existing mobile platform builds ◦ Created a framework that sped up the debugging process by 30%
SCHOLASTIC ACHIEVEMENTS	◦ Best student paper award in the 20th ACM International Conference on Hybrid Systems: Computation and Control (HSCC), 2017 ◦ Prof. Achim Bopp prize for best student hardware project at IITM, 2014 ◦ Central Board of Secondary Education scholarship for undergraduate studies

SCHOLASTIC ACHIEVEMENTS (CONTD.)	<ul style="list-style-type: none"> <li>◦ Indian Institute of Technology Joint Entrance Examination All-India Rank of 709, where a total of 384,977 students gave the exam (in top 0.002%)</li> <li>◦ All India Engineering Entrance Examination All-India Rank 609 and Tamil Nadu State Rank 18, where over 1 million students gave the exam (in top 0.001%)</li> </ul>
PUBLICATIONS (SCHOLAR)	<p>1 book chapter, 2 peer-reviewed journal and 13 peer-reviewed conference papers, and submitted 3 journal and 4 conference papers for peer-review</p> <ul style="list-style-type: none"> <li>◦ <b>A. Vinod*</b>, V. Sivaramakrishnan*, M. Oishi, “Piecewise-Affine Approximation-Based Stochastic Optimal Control with Gaussian Joint Chance Constraints,” American Control Conference (ACC), 2019 (* equal contrib.)</li> <li>◦ <b>A. Vinod*</b>, S. Rice*, Y. Mao, M. Oishi, B. Acikmese, “Stochastic Motion Planning Using Successive Convexification and Probabilistic Occupancy Functions,” Conference on Decision and Control (CDC), 2018 (* equal contrib.)</li> <li>◦ <b>A. Vinod</b> and M. Oishi, “Scalable Underapproximative Verification of Stochastic LTI Systems Using Convexity and Compactness,” Hybrid Systems: Control and Computation, 2018 (<b>Finalist for best paper award</b>)</li> <li>◦ <b>A. Vinod</b>, B. HomChaudhuri, and M. Oishi, “Forward stochastic reachability analysis for uncontrolled linear systems using Fourier Transforms,” Hybrid Systems: Control and Computation, 2017 (<b>Best paper award</b>)</li> <li>◦ <b>A. Vinod</b>, A. D. Mahindrakar, S. Bandyopadhyay, and V. Muralidharan, “A Deterministic Attitude Estimation Using a Single Vector Information and Rate Gyros,” IEEE/ASME Transactions on Mechatronics, 2015</li> </ul>
RELEVANT COURSES	<p><b>Online:</b> Machine learning, Optimization (convex and discrete), Game theory</p> <p><b>UNM:</b> Probability and stochastic processes, Advanced calculus — I &amp; II, Detection and estimation theory, Advanced probability theory, Complex systems theory, Multivariable control theory, Linear systems</p> <p><b>IITM:</b> Computer Methods in Electrical Engineering, Nonlinear systems, Mechanics of Robotic Manipulators, Fundamentals of Medical Instrumentation</p>
EXTRA- CURRICULAR ACTIVITIES	<p><b>PhoneGap application</b> ..... May 2015</p> <ul style="list-style-type: none"> <li>◦ Created a Phonegap application to visualize personal mobility data</li> <li>◦ Used MQTT and Amazon AWS to complete this project in two weeks</li> </ul> <p><b>TATA EngiNX Innovation Challenge</b> ..... June 2013 – September 2013</p> <ul style="list-style-type: none"> <li>◦ Collaborated on an Android application to recognize American Sign Language</li> </ul> <p><b>Android Application Development</b> ..... Summer 2013</p> <ul style="list-style-type: none"> <li>◦ Developed a test-taking application for the placement team of the institute</li> <li>◦ Tested for Android 2.3 (Gingerbread) and above</li> </ul> <p><b>Core member of Institute Electronics Club</b> ..... August 2012 – May 2013</p> <ul style="list-style-type: none"> <li>◦ Conducted three hands-on training sessions on development boards</li> </ul> <p><b>FIRA Robosoccer World Cup</b> ..... October 2011 – August 2013</p> <ul style="list-style-type: none"> <li>◦ Led the Indian team in Robosoccer World Cup, 2013, held in Bristol, UK</li> <li>◦ Implemented efficient control and communication protocols for the robots</li> <li>◦ Used object-oriented programming in C++ for the robot control</li> </ul>
